

SITE SERVICES DIVISION

**SWEL GROUP consists of 2 companies,
WeldExcel and WeldFab.**

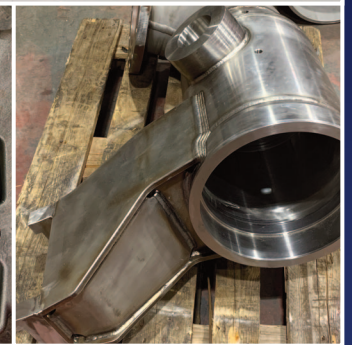

WeldExcel is SWEL groups site division which carries out precision welding operations, metal fabrications and pipe installation at our customers sites. Our teams of highly skilled welders and fabricators operate on power stations, wind energy installations, factory maintenance and can be called on to produce work to the highest of standards.

We have over 50 qualified weld procedures for all materials ranging from super duplex and aluminium to carbon steels, stainless steels and Inconel. Our teams can be mobilised rapidly nationally and internationally and all our staff are coded welders and apprentice trained fully skilled tradesmen. Below are a list of our services and some examples of our work, for more information contact us at sales@swelgroup.co.uk or call our team of specialist engineers on **0191 2670032**

Our services include:

- Weld reclamations of critical parts, turbine blades, pumps, impellers
- Industries served include Subsea, Oil and Gas, Power Generation, Water, Renewable Energy and Nuclear
- SWEL specialise in non ferrous fabrication including aluminium, duplex, Inconel and all stainless steel grades
- Pig launchers and receivers. Sub-sea equipment
- Umbilical pipeline equipment and bend restrictors
- ROV tooling
- ROV skids and equipment
- Machined fabrications
- NDT and pressure testing
- Comprehensive manufacturing record books
- Pipe fabrication and hydraulic equipment.
- Specialist welding, procedures for duplex, all steels including SQ 690, all stainless steels and most exotic metals
- Emergency call out for weld repairs and site work
